CAHP Release 1.4 Successful Deployment

Good Morning,

We would like to confirm the successful deployment of the CAHP release 1.4 Integration with Aurion on Saturday 19th May 2018.

The integration **does not affect** any work that you may be undertaking within the CAHP solution, however it will provide seamless integration for data transfer of the pay schedule into Aurion. The timing of the integration will allow legacy solution data to also run on the Saturday instead of the Monday speeding up the process for Payroll.

Thank you for your ongoing support,

The CAHP Project Team.
