UPDATE 2: CAHP Production Discrepancy

Dear Colleagues,

Some Schools are seeing discrepancies between the “time per session” on an activity in the Course Planning page, and the “time per session” on the specific weekly activities.

We have investigated and identified the cause. It is a side effect of the implementation of the enhancement to be able to edit the imported “time per session” from Syllabus+.

The development team are testing a fix and we will communicate once more details are known. As the fix is complex we are hoping to have this delivered by Friday this week, but we will keep you up to date with our progress.

If you have identified this issue within your schools data, please advise Karina Mauer and Kim Harrison. Karina.mauer@uq.edu.au kim.harrison@uq.edu.au

We recommend that until a fix is implemented you do not manually adjust these hours. This issue should not impact any other information you add to activities.

We are very sorry for the impact this may have in your Semester 2 preparations. A further update will be provided by Friday with the latest information unless resolved earlier.

If you have any questions in regards to the preparation requirements, please contact the CAHP Support team at:

- Email: CAHP_Support@uq.edu.au
- Phone: (336) 54967

Thank you for your ongoing support,

The CAHP Project Team.
