EA Salary Increases – Bulk termination of Casual Academics without current placement

Dear School Managers and Administrators,

As you are probably already aware, a salary increase of 2% or flat rate of \$1,700 has been applied to all staff covered under the EA who were employed with UQ as of the 3 October 2018, effective from 31 March 2018. This group of staff includes casual academics who meet the eligibility requirements.

In order to facilitate the processing of this pay increase, casual academics who are active in Aurion, but don't have a current placement will undergo a bulk termination process. As these people don't have current placements, they are not considered to be current employees, and terminating them will not have an impact on the transfer of the pay schedule to Aurion.

If you need these people to be re-employed at a future date, they can be rehired through either the new hire or placement process in CAHP.

Thank you for your ongoing support to the development of CAHP. If you have any questions about the above, please contact us.
