

**Setting up projects for donations;  
is the donor intent research/non research?  
General or specific use?**

**Note**

Any project that has reporting requirements has to be set up in a project, regardless of the value.

For US GAAP the Advancement Office is required to categorise all donations as restricted, temporary restricted or unrestricted - how specific the donor intent is determines the category.

Anything restricted or temporary restricted is required to be recorded in a project for UQ reporting purposes.
